5/8/2013 - DOC VERSION: 35	F5 BIG-IP PRODUCT MATRIX

VERSION	The release **version** number indicates the **minimum** supported software version to support the platform with the module combination.
SUPPORTED	**Green** indicates a fully supported combination of products, software, and platform. **Light Green** indicates **New** or Changed.
NOT RECOMMENDED	**Yellow** indicates potential functional or performance problems. Limited Support.
--- NOT SUPPORTED	**White with dashes ---** indicates **NOT SUPPORTED**. There is no support for this configuration or any other configuration not shown.

Product Platform	VE	VELab	1600	2000S	2200S	3600	3900	4000S	4200V	6900	8900	8950	10200V	VCMP 10200V	11000	11050	VIPRION B2100	VCMP B2100	VIPRION B4100	VIPRION B4200	VCMP B4200	VIPRION B4300	VCMP B4300

Triple Product Combos — LTM is required. Full Triple Combo support requires newer systems with more hardware resources. As of 11.3.0, 3600 no longer supports triplet combos due to memory constraints.

LTM+LC+GTM	LC is a subset of GTM and is **mutually exclusive**. There is no upgrade from LC to GTM.																						

Quad Product Combos — LTM is required. Full Quad Combo support requires newer systems with more hardware resources.
